CHAPTER XI. TRADING RULES

* * * * *

Rule 11.8. Order Types

(No change).

(a) (No change).

(1) – (3) (No change).

(4) Display. Under Rule [11.10(a)(3)(A)]11.16(e)(5), where a non-routable buy (sell) Market Order is entered into the System and the NBO (NBB) is greater (less) than the Upper (Lower) Price Band, such order will be posted by the System to the EDGX Book and priced at the Upper (Lower) Price Band, unless (i) the order includes a TIF instruction of IOC or FOK, in which case it will be cancelled if not executed, or (ii) the User entered a Cancel Back instruction. A Market Order to buy (sell) that is posted by the System to the EDGX Book and displayed at the Upper (Lower) Price Band will be re-priced and displayed at the Upper (Lower) Price Band if Price Bands move such that the price of the resting Market Order to buy (sell) would be above (below) the Upper (Lower) Price Band or if the Price Bands move such that the order is no longer posted and displayed at the most aggressive permissible price. The System shall re-price such displayed interest to the most aggressive permissible price until the order is executed in its entirety or cancelled. A Market Order that includes both a TIF instruction of Day or RHO and a Short Sale instruction that cannot be executed because of the existence of a Short Sale Circuit Breaker will be posted and displayed by the System to the EDGX Book and priced in accordance with the Short Sale Re-Price instruction described in Rule 11.6(l)(2).

(5) – (7) (No change).

(b) - (c) (No change).

(d) (No change).

(1) – (6) (No change).

(7) Limit-Up/Limit Down. Pursuant to Rule [11.10(a)(3)]11.16(e), MPM Orders will not trade with any other orders when the midpoint of the NBBO is below the Lower Price Band or above the Upper Price Band. MPM Orders will continue to execute at the midpoint of the NBBO as long as the execution price is between the Lower and Upper Price Bands.

(e) – (f) (No change).

Rule 11.9. Priority of Orders

(a) (No change.)

(1) (No change.)

(2) (No change).

(A) – (C) (No change).

(D) (No change).

(i) (No change).

(ii) orders re-ranked subject to the Re-Pricing instruction to comply with Rule 201 of Regulation SHO under Rule 11.6(1)(2), including Market Orders that are displayed on the EDGX Book pursuant to Rule 11.8(a)(4) [and Rule 11.10(a)(3)(A)], maintain the same priority as Limit Orders at that price.

(3) – (7) (No change).

[(8) If the Upper (Lower) Price Band moves so that the price of a buy (sell) order resting on the EDGX Book would consequently be above (below) the Upper (Lower) Price Band, such order will be re-priced and displayed at a price equal to the Upper (Lower) Price Band, provided a new time stamp, and prioritized based on its existing time stamp at the time the new Price Bands are established. If an order is resting on the Book at a price equal to the Upper (Lower) Price Band, such order will not be re-priced but will be provided a new time stamp and prioritized based on its existing time stamp at the time the new Price Bands are established.]

(b) (No change.)

Rule 11.10. Order Execution

(a) (No change).

(1) - (2) (No change.)

(3) Compliance with the requirements of the Plan. Except as provided in Section VI of the Plan, for any executions to occur during Regular Trading Hours, such executions must occur at a price that is greater than or equal to the Lower Price Band and less than or equal to the Upper Price Band, when such Price Bands are disseminated. The Exchange's procedures for handling executing, re-pricing and displaying orders in connection with the Plan are further

described in Rule 11.16(e).

[(A) Where a non-routable buy (sell) order is entered into the System at a price less (greater) than or equal to the Upper (Lower) Price Band, such order will be posted to the EDGX Book or executed, unless (i) the order that includes a TIF instruction of IOC or FOK, in which case it will be cancelled if not executed, or (ii) the User has entered instructions to cancel the order.

(B) When a non-routable buy (sell) order arrives at a price greater (less) than the Upper (Lower) Price Band, the Exchange will re-price such order and display such buy (sell) order at the price of the Upper (Lower) Price Band. If the price of the Upper (Lower) Price Band moves above (below) a non-routable buy (sell) order's displayed posting price, such buy (sell) order will not be adjusted further and will remain posted at the original price at which it was posted to the EDGX Book. If the Upper (Lower) Price Band crosses a non-routable buy (sell) order resting on the EDGX Book, such buy (sell) order will be re-priced to the price of the Upper (Lower) Price Band.

(C) A description of the behavior of routable market and Limit Orders in response to the Plan is found in Rule 11. 11(b)(1).

(D) Where a short sale order is entered into the System with a limit price below the Lower Price Band and a short sale price test restriction under Rule 201 of Regulation SHO is in effect for the covered security, the System will re-price such order to the Lower Price Band as long as the Lower Price Band is at a Permitted Price. When a short sale order is entered into the System with a limit price above the Lower Price Band and a short sale price test restriction under Rule 201 of Regulation SHO is in effect for the covered security, the System will re-price such order, if necessary, at a Permitted Price pursuant to Exchange Rule 11.6(k).

(E) Pursuant to Section IV of the Plan, all Trading Centers in NMS Stocks, including those operated by Members of the Exchange, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the requirements specified in Section VI of the Plan, and to comply with the Trading Pauses specified in Section VII of the Plan.]

(4)-(5) (No change.)

(b)-(f) (No change.)

Rule 11.11. Routing to Away Trading Centers

(No change).

(a) (No change.)

(b) The Plan. The Exchange will handle routable orders in connection with the Plan as described in Rule 11.16(e).

[(1) In order to comply with the Plan, a routable buy (sell) Market or routable marketable Limit Order will be routed by the Exchange only when the NBO (NBB) is or becomes executable according to the Plan, which would be when the NBO is less than or equal to the Upper Price Band (NBB is greater than or equal to the Lower Price Band). According to the Plan, the NBO (NBB) is or becomes non-executable when the NBO is greater than the Upper Price Band (the NBB is less than the Lower Price Band) (“Non-Executable”).

Except for routing strategies SWPA and SWPB, for purposes of the below subparagraphs, routing strategies that access all Protected Quotations include ROUT, ROUX, ROUC, ROUE and ROOC. Routing strategies that do not access all Protected Quotations include all other routing strategies listed in paragraph (g), as described below.

(i) **Routable Market Orders.** For routing strategies that access all Protected Quotations, if the NBO (NBB) is Non-Executable and a buy (sell) Market Order is placed, the System will default to re-price such buy (sell) market order and display it at the price of the Upper (Lower) Price Band and will continue to re-price it to the price of the Upper (Lower) Price Band as the Upper (Lower) Price Band adjusts, so long as the buy (sell) Market Order does not move above (below) its market collar price, as defined in Rule 11.8(a)(7), or alternatively, such buy (sell) Market Order may be cancelled pursuant to User instruction. For all other routing strategies that do not access all Protected Quotations, routable Market Orders will not be re-priced and displayed at the price of the Upper (Lower) Price Band and will instead be cancelled if the NBO (NBB) is Non-Executable.

If the Upper (Lower) Price Band crosses a routable buy (sell) order resting on the EDGX Book, such buy (sell) order will be re-priced to the price of the Upper (Lower) Price Band.

(ii) **Routable Limit Orders.** If the price of (i) a routable buy (sell) Limit Order that is entered into the System or (ii) the unfilled balance of such order that is returned from routing to away Trading Centers is greater (less) than the Upper (Lower) Price Band and is ineligible for routing as a result of the NBO (NBB) being or having become Non-Executable, then the System will default to re-price such buy (sell) order and display it at the price of the Upper (Lower) Price Band, or alternatively, it may be cancelled pursuant to User instruction. For routing strategies that access all Protected Quotations, if the Upper (Lower) Price Band subsequently moves above (below) the routable buy (sell) order’s posting price, such routable order will continue to be re-priced to the Upper (Lower) Price Band until the order reaches its limit price. For all other routing strategies that do not access all Protected Quotations, the routable order will not be re-priced to a price above (below) the original price at which it was posted to the EDGX Book.

If the Upper (Lower) Price Band crosses a routable buy (sell) order resting on the

EDGX Book, such buy (sell) order will be re-priced to the price of the Upper (Lower) Price Band.]

(c) (Reserved.)[Re-routing. For routing strategies that access all Protected Quotations, when the Upper (Lower) Price Band adjusts such that the NBO (NBB) becomes executable, a routable buy (sell) Market or marketable Limit Order will be eligible to be re-routed by the Exchange.]

(d) (Reserved.)[Routing strategies SWPA and SWPB (together, “SWP”), as described in paragraph (g), are eligible for routing in accordance with the Plan as follows: the System will immediately cancel orders utilizing an SWP routing strategy when an order to buy utilizing an SWP routing strategy has a limit price that is greater than the Upper Price Band or if a sell order utilizing an SWP routing strategy has a limit price that is less than the Lower Price Band.]

(e) - (i) (No change.)

* * * * *

Rule 11.16. Trading Halts Due to Extraordinary Market Volatility

(No change.)

(a) - (b) (No change.)

(c) [Re-opening of Trading

(1) The re-opening of trading following a trading halt under this Rule will be conducted pursuant to procedures adopted by the Exchange and communicated by notice to its Members.

(2) If the primary listing market halts trading in all stocks, trading will halt on the Exchange in those stocks until trading has resumed on the primary listing market or notice has been received from the primary listing market that trading may resume. If the primary listing market does not re-open a security within 15 minutes following the end of the 15-minute halt period, the Exchange may resume trading in that security.

[(d) If a primary listing market issues an individual stock trading pause in any NMS Stock, other than rights and warrants, the Exchange will pause trading in that security until trading has resumed on the primary listing market. If, however, trading has not resumed on the primary listing market and ten minutes have passed since the individual stock trading pause message has been received from the responsible single plan processor, the Exchange may resume trading in such stock.

During Phase 1 of the Plan, an individual stock trading pause in Tier 1 NMS Stocks that are subject to the requirements of the Plan shall be subject to Section VII (Trading Pauses) of the Plan. Tier 1 NMS Stocks not yet subject to the requirements of the Plan and Tier 2 NMS Stocks shall be subject to the requirements set forth in this subsection of the Rule. Once the Plan has

been fully implemented and all NMS stocks are subject to the Plan, this subsection of the Rule will no longer apply.

(e) On the occurrence of any trading halt pursuant to this Rule 11.16, all outstanding Post Only orders in the System will be cancelled.]

[(f)](d) Nothing in this Rule 11.16 should be construed to limit the ability of the Exchange to otherwise halt, suspend, or pause the trading in any stock or stocks traded on the Exchange pursuant to any other Exchange rule or policy.

[Interpretations and Policies:

.01 The provisions of paragraph (d) of this Rule shall be in effect during a pilot set to end on the earlier of the initial date of operations of the Regulation NMS Plan to Address Extraordinary Market Volatility or February 4, 2014.]

(e) Limit Up-Limit Down Mechanism

(1) Definitions. All capitalized terms not otherwise defined in this paragraph (e) shall have the meanings set forth in the Plan or Exchange Rules, as applicable.

(2) Exchange Participation in the Plan. The Exchange is a Participant in, and subject to the applicable requirements of, the Plan, which establishes procedures to address extraordinary volatility in NMS Stocks.

(3) Member Compliance. Members shall comply with the applicable provisions of the Plan.

(4) Exchange Compliance with the Plan. The System shall not display or execute buy (sell) interest above (below) the Upper (Lower) Price Bands, unless such interest is specifically exempted under the Plan.

(5) Re-pricing and Cancellation of Interest. Depending on a User's instructions, the System shall re-price and/or cancel buy (sell) interest that is priced or could be executed above (below) the Upper (Lower) Price Band. When re-pricing resting orders because such orders are above (below) the Upper (Lower) Price Band, the Exchange will provide new timestamps to such orders. The Exchange will also provide new timestamps to resting orders at the less aggressive price to which such orders are re-priced. Any resting interest that is re-priced pursuant to this Rule shall maintain priority ahead of interest that was originally less aggressively priced, regardless of the original timestamps for such orders.

(A) Market Orders and Orders with TIF of IOC or FOK. The System will only execute Market Orders or orders with a TIF of IOC or FOK at or within the Price Bands. Market Orders will be handled in accordance with Rule 11.8(a)(4).

(B) Limit-priced Interest. Limit-priced interest will be cancelled if a User has

entered instructions not to use the re-pricing process and such interest to buy (sell) is priced above (below) the Upper (Lower) Price Band. If re-pricing is permitted based on a User's instructions, both displayable and non-displayable incoming limit-priced interest to buy (sell) that is priced above (below) the Upper (Lower) Price Band shall be re-priced to the Upper (Lower) Price Band. The System shall re-price resting limit-priced interest to buy (sell) to the Upper (Lower) Price Band if Price Bands move such that the price of resting limit-priced interest to buy (sell) would be above (below) the Upper (Lower) Price Band. If the Price Bands move again and the original limit price of displayed and re-priced interest is at or within the Price Bands and a User has opted into the Exchange's optional multiple re-pricing process, as described in Rule 11.6(l), the System shall re-price such displayed limit interest to the most aggressive permissible price up to the order's limit price. All other displayed and non-displayed limit interest re-priced pursuant to this paragraph (e) will remain at its new price unless the Price Bands move such that the price of resting limit-priced interest to buy (sell) would again be above (below) the Upper (Lower) Price Band.

(C) Pegged Interest. Orders with a Pegged instruction to buy (sell) shall peg to the specified pegging price or the Upper (Lower) Price Band, whichever is lower (higher).

(D) Routable Orders. If routing is permitted based on a User's instructions, orders shall be routed away from the Exchange pursuant to Rule 11.11, provided that the System shall not route buy (sell) interest at a price above (below) the Upper (Lower) Price Band.

(i) Re-routing. When the Upper (Lower) Price Band adjusts such that the NBO (NBB) becomes executable, a routable buy (sell) Market or marketable Limit Order will be eligible to be re-routed by the Exchange if such order contains an Aggressive or Super Aggressive instruction.

(ii) Routing strategies SWPA and SWPB (together, "SWP"), as described in Rule 11.11(g), are eligible for routing in accordance with the Plan as follows: the System will immediately cancel orders utilizing an SWP routing strategy when an order to buy utilizing an SWP routing strategy has a limit price that is greater than the Upper Price Band or if a sell order utilizing an SWP routing strategy has a limit price that is less than the Lower Price Band.

(E) Sell Short Orders. During a short sale price test restriction pursuant to Rule 201 of Regulation SHO, orders with a Short Sale instruction priced below the Lower Price Band shall be re-priced to the higher of the Lower Price Band or the Permitted Price, as defined in Rule 11.6(k).

(6) Re-opening of Trading following a Trading Pause. At the end of the Trading Pause, the Exchange shall re-open the security as set forth in Rule 11.7(e).

(f) On the occurrence of any trading halt pursuant to this Rule, except where a User has designated that its orders be cancelled, all outstanding orders in the System will remain on the EDGX Book.

(g) All times referenced in this Rule 11.16 shall be Eastern Time.
